REVIEW ROM remakes of the original Game Boy Color, Pokemon HeartGold and SoulSilver games receive updated graphics and gameplay on the Nintendo DS. Pokemon - HeartGold Version ROM Download for Nintendo DS (NDS). Pokemon - HeartGold Version is available for online games and downloads only on DownloadROMs. Pokemon - HeartGold version OFF ROM for Nintendo DS download requires an emulator to play the game offline. This game is the English (USA) version and is the highest quality available. Advertising Okay, so I'm currently playing Pokemon Heart Gold on the nosGba (last version 2.9a) emulator and after beating the 4th gym and saving sweat and trying to resume the game, since it always drops a few seconds after you save and you have to restart the cartridge before it fails (which I have no problem with) I can't load my save... I did tons of research over the internet and found out that most people have this problem and I haven't really found a solution. This is a method of combating piracy nintendo apparently, where the more icons you get, the more often the game will crash after fewer and fewer events. As far as I understand, rum is not good, and the problem is not the emulator or anything. Did anyone overcome this problem or were able to play a full game on the PC somehow? Also, I'll be able to continue with my old save if there's working rum or I have to start over (please note).
